Objective

Experienced estimator skilled in creating detailed technical drawings and generating accurate quotes for multi-purpose steel buildings. Eager to leverage my skills and knowledge to contribute to the successful completion of projects while continually learning and growing professionally.

Education

Postgraduate Degree in Structural Steel Management and Detailing

Conestoga college - Cambridge, Ontario, Canada

January 10, 2022 to April 22, 2023

Bachelor's Degree in Civil Engineering

APJ Abdul Kalam Technological University - Thiruvananthapuram, Kerala, India

July 12, 2016 to September 19, 2020

Skills

- Proficient in preparing detailed cost estimates for steel building projects, including materials, labor, and equipment.
- Experienced with estimation software such as Bluebeam, MBS, MBS Project.
- Create detailed shop drawings and erection plans for steel structures based on architectural and engineering plans according to the specifications using CAD, Tekla and Advance Steel.
- Understanding of building codes, standards, and regulations related to steel construction.
- Ability to manage multiple estimation projects and meet deadlines.
- Experience working collaboratively with managers, engineers, and other stakeholders.
- Examine project plans and specifications to determine the scope of work.

Work Experience

Estimator

Canadian Metal Buildings - Stoney Creek, ON

May 13, 2024 - Present

Role Description

- Utilizing estimating software, create estimates of the likely costs of manpower, materials, and equipment for pre-engineered buildings based on quotes, drawings, and requirements.
- Analyze the structure and design according to the most modern US and Canadian codes.
- Make sure that the spreadsheets and related take-off forms/submittals are formatted so that individuals reviewing the data can easily understand them.
- Gather the necessary supporting documentation and drawings to create project cost estimates using estimating softwares.
- Communicating effectively with stakeholders, including clients, vendors, and internal teams.
- Collaborating with project managers and engineers to ensure accurate estimates.
- Through the use of efficient design methods, lower the structural weight to cut expenses.

Structural Detailer

CDN Buildings – Delhi, ON

June 26, 2023 - April 19, 2024

Role Description

- Utilizing design output to create engineering, design, and shop drawings from permit drawings using computer-assisted design (CAD) and Advance Steel.
- Participate in meetings and site visits related to active projects for a construction review.
- Interpreted engineering drawings, blueprints and knowledge of metal fabrication processes.
- Make a bill of materials and packing list for the fabrication and logistics divisions.
- Following the team leader's directions, prepare written reports and structural details.
- Make necessary changes in the drawings and designs according to the change orders.

Programmer Analyst

Cognizant Technology Solutions – Cochin, India

August 27, 2020 - December 03, 2021

Role Description

- Create and maintain scripts according to the mapping which satisfy the client requirements.
- Create a test strategy, plan, estimate, and create test cases and scenarios for each data type.
- Perform defects logging and tracking, defects retesting and regression testing.

- Create test summary reports and status reports on a daily, weekly, and monthly basis and send them to project managers, business analysts, and customers.
- Use SQL queries to query the database and verify the anticipated outcomes.
- Carry out root cause analysis and code stability checks for any problems that arise during SQL Script runs.
